About me

Since primary school, I have been obsessed with making new stuff, whether it's technology, website, music, or, just a new idea. Taking one thing and scaling to a million is impressive, but taking zero to one sounds more exciting to me. I believe if one knows where to go, skills and knowledge are just tools that help them to get there. So, I am willing to learn anything if it is needed.

Education

The University of Auckland.
Bachelor of Science (double major)

- **Computer Science**
- **Information System**

Experience

BP Golf Academy

Front end developer & designer (Aug/2021 - Jan/2022)
